SCENARIO #1

Proving Grounds of the Mad Overlord

INSTRUCTIONS AND BRIEFING MATERIALS

Proving Grounds of the Mad Overlord is the first Wizardry Scenario and is designed to introduce you to Wizardry, give you practice playing, and allow you to "build" characters up to 13th level or so.

The evil wizard Werdna has stolen a valuable item from the treasure rooms of the mad overlord Trebor. He has placed it somewhere deep in the dungeons of Trebor's castle, and left fearsome monsters there to guard it. Your mission is to develop characters powerful enough to explore the deeper levels of the dungeon and recover the item.

It is rumored that a "control center" exists somewhere in the dungeon, and that this control center allows explorers easy access to the deeper levels of the dungeon where the item may be found. Thus a logical first step would be to find this facility.

Good Luck, and may your Gods be with you!

Tips on Keeping Your Computer Healthy

We hope you are getting a byte or two out of your computer each day. Here are a few tips on prolonging the life of your software.

Clean Your Disk Drives

Cleaning your disk drives takes only a few minutes and makes them work better. Clean your drives every second week.

Get Your Drives Tuned

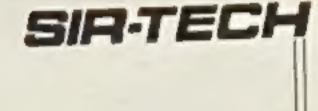

A majority of disk problems are caused by misaligned disk drives. Your most valued software could be damaged. So protect your investment—get your drives aligned and speed adjusted at least twice a year at your themer

Protect Your Computer's Power

Computers like a steady power supply. However, large appliances or equipment send spikes down a power line. These proves spikes cause memory glitches and can alter software if you were writing to the disk when a transient happened. A surge suppressor such as a Blitz Bug will prevent power surges. At \$25 to \$50, they are a good

Follow these tips and you will probably never have a problem with your software. Our experience has been that at least 97% of reported software problems are caused by unmaintained computers. Your dealer is in business to support you. If you have any questions, go see him, he will be happy to help you.

Dear Wizardry Purchaser

Thank you for acquiring the most widely acclaimed game program for the micro-computer. It's popularity is attested to by Wizardry's long term standing as the number one program of its class. Among the reasons for Wizardry's great standing is its exceptional long term playing value.

It has come to our attention that some software vendors are marketing so-called "cheat programs". These products allow you to create characters of arbitrary strength and

While it may seem appealing to use these products, we urge you not to succumb to the temptation. It took more than four years of careful adjustment to properly balance Wizardry. These products tend to interfere with this subtle balance and may substantially reduce your playing pleasure. It would be akin to playing chess with additional queens, or poker with all cards wild

It has also come to our attention that some of these programs are unreliable and may even destroy the data. While we repair or replace inoperative disks free within 30 days of purchase, or for a nominal fee of \$5.00 anytime thereafter, we will not do so for disks damaged by a cheat

With kind regards and our best wishes for many, many hours of fun and pleasure.

- You can RESTART the party using the UTILITIES option
- You can mount a rescue expedition to find the characters. You will need to INSPECT areas of the Maze for the characters. this is explained in the section on moving around the Maze.

If you want to deliberately interrupt an expedition (It's 4 AM and you have to go to work soon), you can use the QUIT option that is available in the Maze. This option will be described more completely in the Adventuring section.

The characters sert another Scenario Diskette will be moved onto this diskette.

• VERY IMPORTANT: If your version of Wizardry has more than one Master Diskette, the characters will always be stored on Diskette "A".

If there are any problems that prevent a proper transfer, the characters will be If there are the SOURCE diskette. MOVE CHARACTERS is used for:

- · Moving characters between Scenario Diskettes that belong to the same game. For example, you might move some of your characters onto a friend's diskette in order to help him mount a rescue expedition.
- Moving characters between Scenario Diskettes that belong to different games. For example, when you start playing the second Scenario, "The Knight of Diamonds", you will need to move characters from a "Proving Grounds" Scenario Diskette onto a "Knight of Diamonds" Scenario Diskette.
 - When you move characters between Scenario Diskettes belonging to different games, your characters will be stripped of all their items. This is because the different games use different sets of items.

It's a good idea to make copies of your characters every so often to guard against "Acts of God." To backup your characters, write-protect the Scenario Diskette they are on, make a new Scenario Diskette (which won't have any characters on it) and move all of your characters from the write-protected Scenario Diskette to the new Scenario Diskette.

- Remember to write-enable your Scenario Diskette (by removing the write-protect tab) before using it again.
- Mark the backup diskette prominently so that you don't get it confused with your regular Scenario Diskette.
 - This way, you won't wonder why your wonderful 10th level characters of last night are suddenly your 9th level characters of last week!
